

## HochikiCAD Powered By CADGEN Software LLC.

**HochikiCAD is the complete solution you need to produce Fire and Security designs.**

### DESCRIPTION

The team behind HochikiCAD has a collective 70 years of exclusive experience in the Fire industry, and this experience is what makes our products surpass the competition.

HochikiCAD was designed by engineers and CAD designers to maximize efficiency, AHJ approval rates, and cut design time in half. Combine all this with a software development team with 15 years of providing Autodesk® software solutions, and you get a world class product.

By leveraging AutoCAD® OEM as our robust and feature rich platform, we have the ability to exclusively work on features related to improving Fire and Security design, while providing you with the standard platform features you can count on.

Consistency in design output is key! Feel free to use your existing DWG templates, title blocks and drawing standards. Your existing blocks can also be used to define your devices. We will help you set up master SQL project templates which the CAD operator can choose from when starting a new project, containing the applicable parts for the project and circuit requirements.

### STANDARD FEATURES

- Tested and Improved with hundreds of real world projects
- Handles the most demanding applications
- Designed for ease of use

### INDUSTRY STANDARD PLATFORM

- HochikiCAD is powered by AUTODESK® AUTOCAD® OEM 2020
- Natively DWG file compatible
- All the latest platform features (drawing compare, PDF import, XREFS, layout sheets and plotting) are included
- AUTOCAD® experienced designers will feel right at home!

### FLEXIBLE DATABASE MANAGEMENT

- The included database management utility is designed for easy configuration of all part types
- Arbitrary circuit types offer maximum flexibility
- Product databases can be hosted in the cloud or on a server

### DESIGNED BY FIRE INDUSTRY PROFESSIONALS
