Locating Device Manager in Windows 10

There are, of course, various ways to reach Device Manager in Windows 10. This document will explorer three ways to find Device manager:

1.1 The 'File Explorer' method

From the Desktop screen, Click on the Windows button in the lower left hand corner.

Click on 'File Explorer'.

Right Click on 'This PC'.

From the drop down box, click on 'Properties'.

🕨 💻 This	PC.	<u> </u>
н	Expand	e
	👎 Manage	e
> 💣 N	Pin to Start	
	Map network drive	- F
	Open in new window	
	Pin to Quick access	
	Disconnect network drive	
	Add a network location	4
	Delete	e
	Rename	
	Properties	4
		e

From the Properties/System window, select Device Manager.

1.2 The 'Settings' method

Click on Windows button

in the lower left hand corner.

From the Start window, Click on 'Settings'.

From the 'Settings' window, Click on 'System'

On the Systems window, Click on 'About'.

← Settings			-	
🐯 SYSTEM		Find a setting		٩
Display	Customize your display			
Notifications & actions				
Apps & features				
Multitasking	1			
Tablet mode				
Power & sleep

1.3 The 'Cortana' method

Within the Windows 10 Desktop screen, Cortana may be located within the left side of the Task Bar. (Cortana's placement in this location is a default location, if selected during Windows 10 setup)

Type 'Device Manager' in the Cortana search box. Search results will be displayed.

Click on Device Manager within the search results.
